## **Course Outcome 4 (CO4):**

1. Create a Graphics package that has classes and interfaces for figures Rectangle, Triangle, Square and Circle. Test the package by finding the area of these figures.

## **PROGRAM**

//Area1.java

```
package Graphics;
```

```
interface Area1
```

```
{
    public void Rectangle();
    public void Triangle();
    public void Square();
    public void Circle();
    public void getRect();
    public void getTri();
    public void getSqr();
    public void getCrI();
}
```

//shapes.java

```
package Graphics;
```

```
import java.util.*;
```

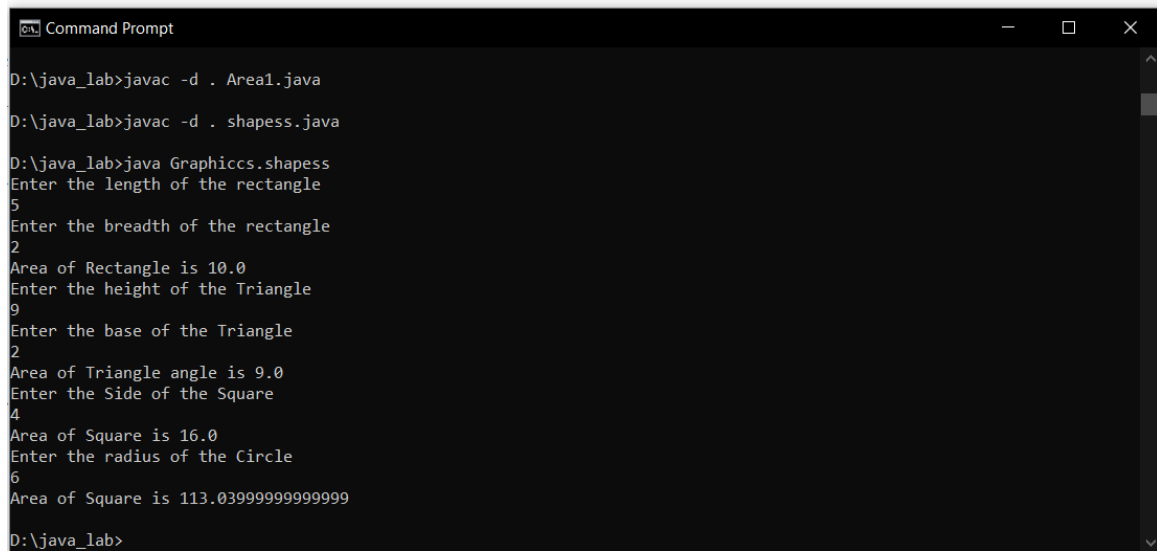

```
public class shapes implements Area1
```

```
{
    double lr,lb,ra,th,tb,ta,saa,sa,cr,cc;
    public void getrect()
    {
        Scanner ab= new Scanner(System.in);
        System.out.println("Enter the length of the rectangle");
        lr=ab.nextInt();
        System.out.println("Enter the breadth of the rectangle");
        lb=ab.nextInt();
    }
}
```

```
}  
  
public void rectangle()  
{  
    ra=lr*lb;  
    System.out.println("Area of Rectangle is "+ra);  
}  
  
public void getTri()  
{  
    Scanner cb= new Scanner(System.in);  
    System.out.println("Enter the height of the Triangle");  
    th=cb.nextInt();  
    System.out.println("Enter the base of the Triangle");  
    tb=cb.nextInt();  
}  
  
public void Triangle()  
{  
    ta=0.5*th*tb;  
    System.out.println("Area of Triangle angle is "+ta);  
}  
  
public void getSqr()  
{  
    Scanner sq= new Scanner(System.in);  
    System.out.println("Enter the Side of the Square");  
    sa=sq.nextInt();  
}  
  
public void Square()  
{  
    saa=sa*sa;  
    System.out.println("Area of Square is "+saa);  
}
```

```
public void getCrl()
{
    Scanner sc= new Scanner(System.in);
    System.out.println("Enter the radius of the Circle");
    cc=sc.nextInt();
}
public void Circle()
{
    cr=3.14*cc*cc;
    System.out.println("Area of Square is "+cr);
}
public static void main(String[] args)
{
    shapess o= new shapess();
    o.getrect();
    o.rectangle();
    o.getTri();
    o.Triangle();
    o.getSqr();
    o.Square();
    o.getCrl();
    o.Circle();
}
}
```

# OUTPUT

```
Command Prompt
D:\java_lab>javac -d . Area1.java
D:\java_lab>javac -d . shapess.java
D:\java_lab>java Graphicscs.shapess
Enter the length of the rectangle
5
Enter the breadth of the rectangle
2
Area of Rectangle is 10.0
Enter the height of the Triangle
9
Enter the base of the Triangle
2
Area of Triangle angle is 9.0
Enter the Side of the Square
4
Area of Square is 16.0
Enter the radius of the Circle
6
Area of Square is 113.03999999999999
D:\java_lab>
```

2. Create an Arithmetic package that has classes and interfaces for the 4 basic arithmetic operations. Test the package by implementing all operations on two given numbers

# PROGRAM

```
//operations.java
```

```
package Aarithmetic;
```

```
interface operations
```

```
{
```

```
    public void input();
```

```
    public void add();
```

```
    public void subtract();
```

```
    public void multiply();
```

```
    public void division();
```

```
}
```

```
//basic.java

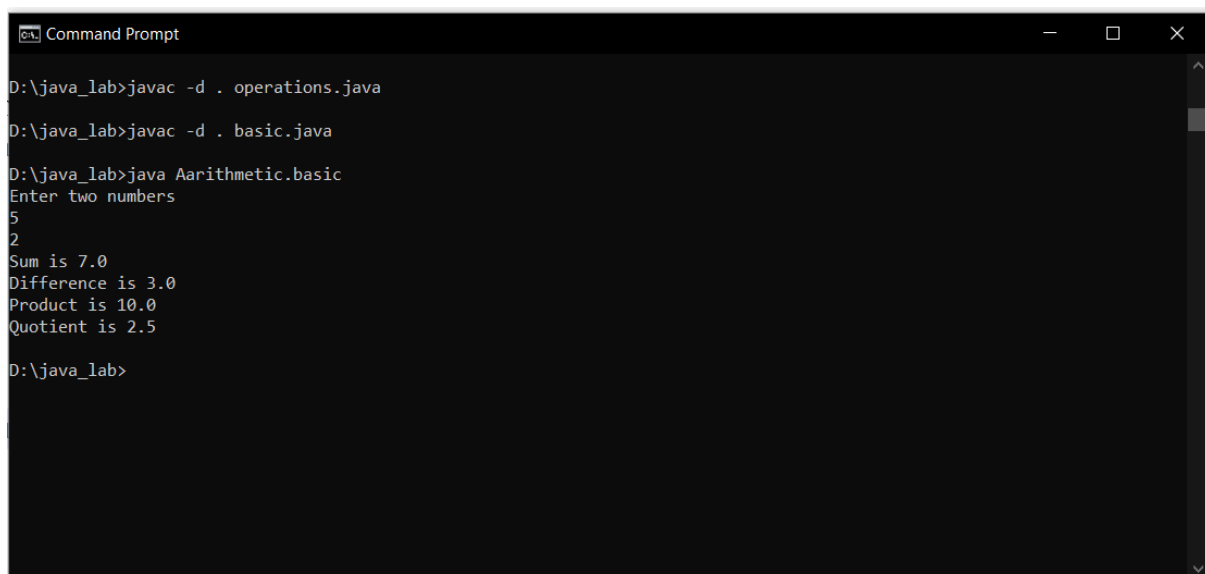

package Aarithmetic;

import java.util.*;

public class basic implements operations
{
    double a,b,ad,dif,mult,div;
    public void input()
    {
        Scanner ab=new Scanner(System.in);
        System.out.println("Enter two numbers");
        a=ab.nextInt();
        b=ab.nextInt();
    }
    public void add()
    {
        ad=a+b;
        System.out.println("Sum is "+ad);
    }
    public void subtract()
    {
        dif=a-b;
        System.out.println("Difference is "+dif);
    }
    public void multiply()
    {
        mult=a*b;
        System.out.println("Product is "+mult);
    }
}
```

```
    }  
    public void division()  
    {  
        div=a/b;  
        System.out.println("Quotient is "+div);  
    }  
    public static void main(String[] args)  
    {  
        basic o=new basic();  
        o.input();  
        o.add();  
        o.subtract();  
        o.multiply();  
        o.division();  
    }  
}
```

## OUTPUT

```
Command Prompt  
D:\java_lab>javac -d . operations.java  
D:\java_lab>javac -d . basic.java  
D:\java_lab>java Aarithmetic.basic  
Enter two numbers  
5  
2  
Sum is 7.0  
Difference is 3.0  
Product is 10.0  
Quotient is 2.5  
D:\java_lab>
```
